 Here are entered works on services, commonly called newsgroups and LISTSERV lists, that allow a computer user to post messages to, and read messages from, a group of people who have a common interest, usually by means of the Internet, a commercial online service, or electronic mail. Works on services that allow a computer user to post messages to, and read messages from, a group of people who have a common interest, via a dedicated telephone line established for the purpose, are entered under Computer bulletin boards. Works on services that allow a person, using a computer, to engage in an actual "conversation" with other people in real time are entered under Online chat groups.

 Here are entered works on an internationally regulated, market-based "cap-and-trade" program designed to reduce the emission of polluting gases into the atmosphere by allowing participating polluting nations or companies to either reduce their total emissions or buy credits from less polluting nations or companies. Works on the practice of compensating for the carbon dioxide emissions produced by one activity or in one location, by voluntarily paying for a corresponding reduction in such emissions produced by a different activity or in a different location are entered under Carbon offsetting.

Extraterrestrial anthropology

Here are entered works on the prospective use of the science of anthropology in dealing with intelligent beings in outer space, or establishing earth colonies on extraterrestrial bodies. Works on life indigenous to

outer space are entered under Life on other planets. Works on the study of processes occurring in outer space that are relevant to biology, especially the origin and evolution of life, are entered under Exobiology. Works on the biology of humans or other earth life while in outer space are entered under Space biology.
